Upgrade your Bullard Thermal Imager to the new Bullard XT or X Factor Series of Thermal Imagers for a SPECIAL PRICE. Get the best image quality. Now through December 31st, 2018.

EXTENSIVE ELIGIBILITY

If you own a Bullard Thermal Imager manufactured after January 1st, 2007, and it has no performance defects, you're eligible for the special upgrade. There's no limit on the quantity. If your functioning unit was manufactured before 2007, it is eligible for the trade-in program.

TRANSFERABLE FEATURES

You get the same resolution and features† that you currently have on the unit you're upgrading or better! If you have a 160 x 120 resolution TI, you'll be upgraded to a 240 x 180 resolution for free. If you lacked Super Red Hot or Temperature Measurement, it will be added for free. New batteries and a desktop charger are included with every upgrade, as well as a communications port with Eclipse® LDX. Additionally, you can always add features you didn't have or that weren't available on your current product.

HASSLE FREE PROCESS

Visit www.bullard.com/xfactorti/upgrade/add-camera to check your unit's eligibility and begin the upgrade process.

THREE YEAR WARRANTY

All XT or X Factor upgrades receive a three-year warranty on parts and labor. Additionally, you can grow to five years of coverage by adding the optional two-year warranty. With the XT Series, you get an additional benefit with a five-year battery warranty.

† DVR must be purchased separately, except those not available across product models.
